PROJECTS

Ecommerce Computer Shop
Demo **Code**

Tech used: React - Sass - Context API

An Advanced Ecommerce App that you can make full shopping steps, Add items to favorite list , Manage your orders and there is Dark/Light mode and more features

Games
Demo **Code**

Tech used: React - Sass

Multiple Games in one App (Tic Tac Toe - Memory Cards) More games will be added in this app

Portfolio
Demo **Code**

Tech used: React - Sass

This is my first portfolio, I tried to make it more creative and different, This Website looks like an office and you can use items on the table to see my Projects , Contact info and Skills, it has Dark/Light mode

Todo App
Demo **Code**

Tech used: React - Redux ToolKit

Simple Todo App with filter and edit ,check and delete buttons

Phone Chatting
Demo **Code**

Tech used: Vanilla JavaScript

This was my first published project i made after learning JavaScript, It's not realtime chatting app , You can make conversations with both sides on the same device and change users names and images.

ABOUT ME

I'm A Person who enjoys creating things, My previous job was Drawing Portraits i also was Producing Electronic House Music on FL Studio when i was young and one of my music reached 150K views on soundcloud (page name Manjex) i made games too when i was young using Game Maker (without coding), I love searching and learning new things, Learning more makes me create better and useful things,
